

iMeeting

What is iMeeting

iMeeting is designed to work seamlessly with Outlook, making meeting room booking much easier never than before. iMeeting is a real time meeting room booking solution that increase the productivity use of your meeting room resources and prevents both double booking and forgotten cancellations. With iMeeting, you can now integrate with your existing Outlook calendar for meeting room booking purposes, customers use Outlook global address list to send meeting request to invite parties to join the meeting. The meeting schedule can be broadcasted to LCD display at real time. If a meeting is rescheduled or cancelled, the meeting schedule will be automatically updated in the LCD display as well.

With iMeeting you can centrally manage your meeting room booking and keep everyone in the office informed of the booking status. Management can see the meeting room booking utilization report for review purposes.

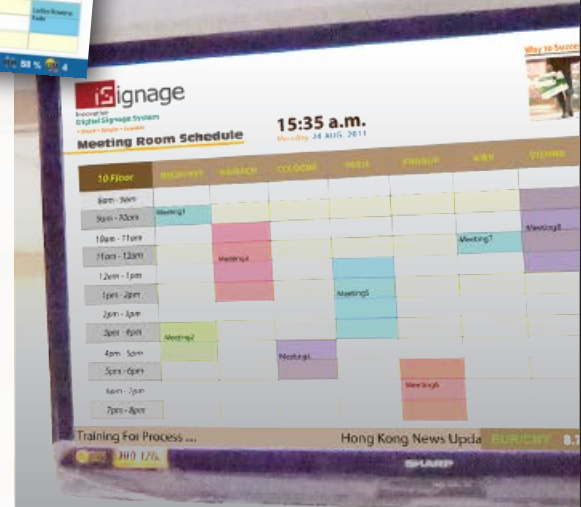

Check Meeting Room Availability At Your Company Intranet

iMeeting can integrate with your company intranet and allow your staffs to check the meeting room availability before they send an meeting request to invite parties to join the meeting, you can add the iMeeting icon on your company intranet page so that internal staffs can send their meeting request through the intranet page.

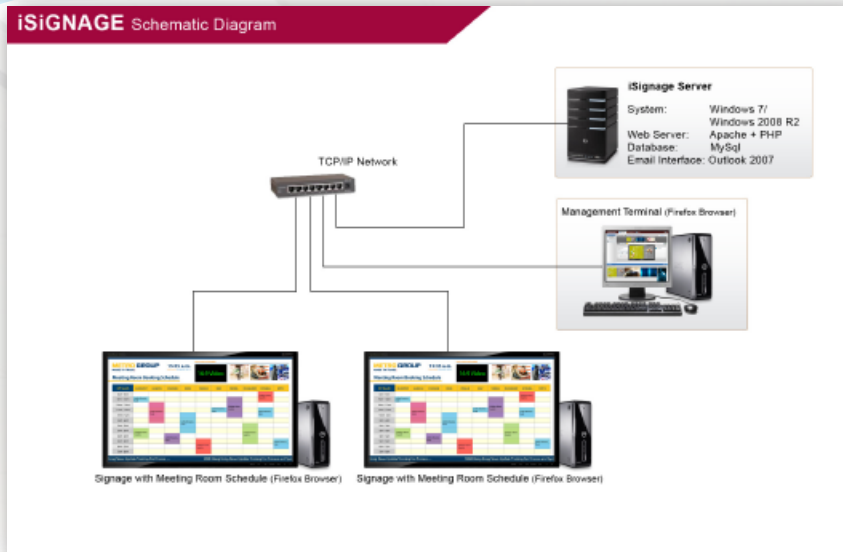

Add Corporate Information to Your Meeting Schedule

Customer can also add corporate video, photos, ticker message, RSS feed such as weather, exchange rate information to the display panel to keep everyone in the office well informed of the related information.
